

## Fun Frog Facts:

Frogs are amphibians. They start their lives in water and then live on land.  
Color Taddy's story as she grows from an egg to a tadpole to a frog.

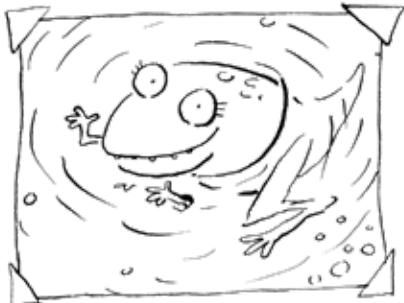

Taddy is one egg in a million!

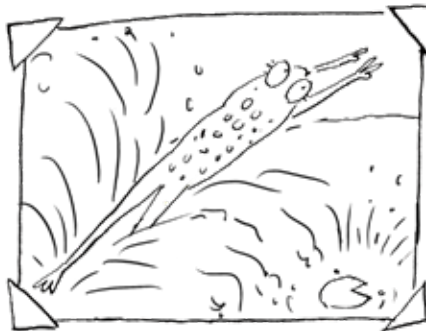

She hatched!

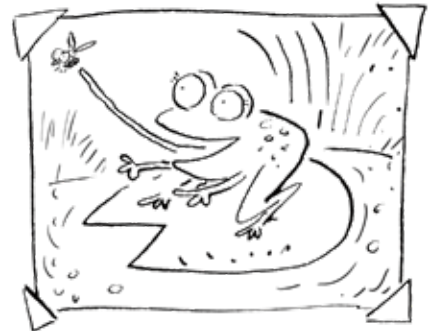

Taddy's first legs!

She comes up for air.

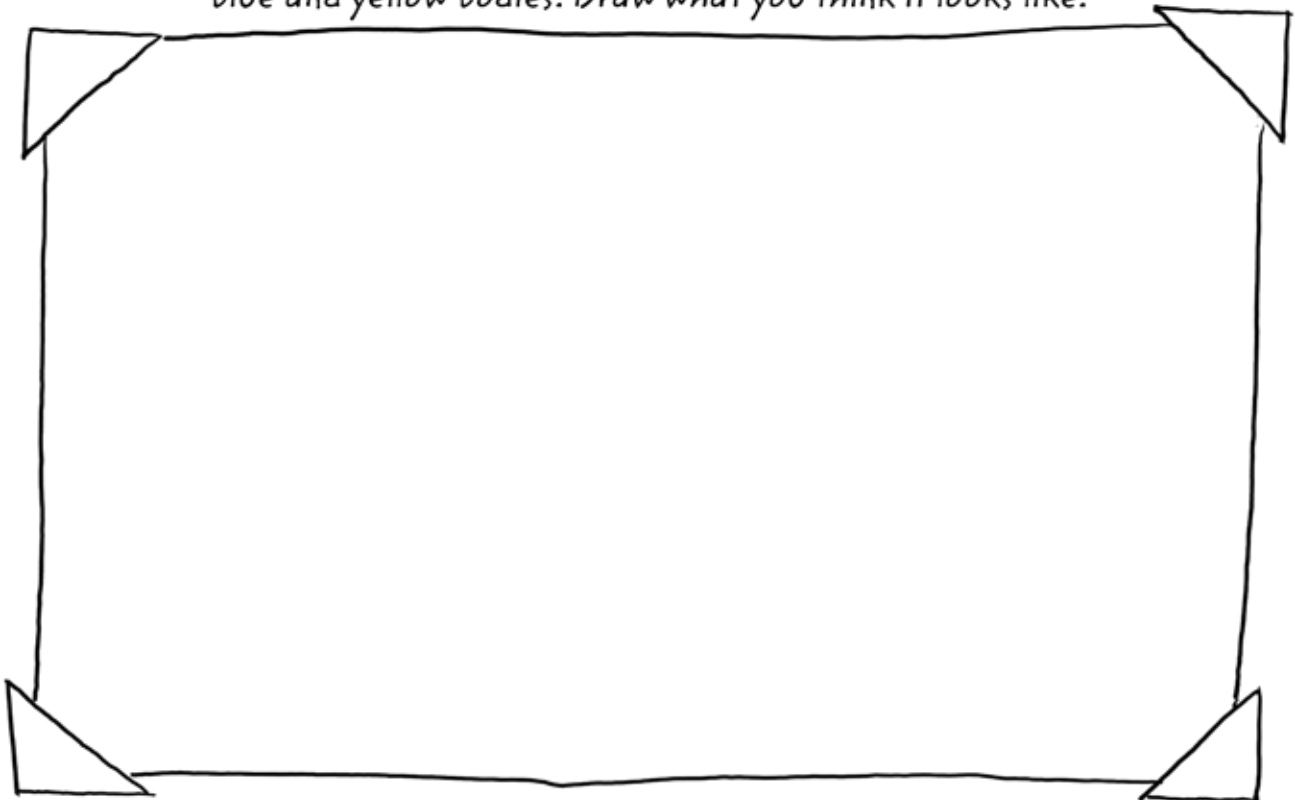

Her first hop ashore.

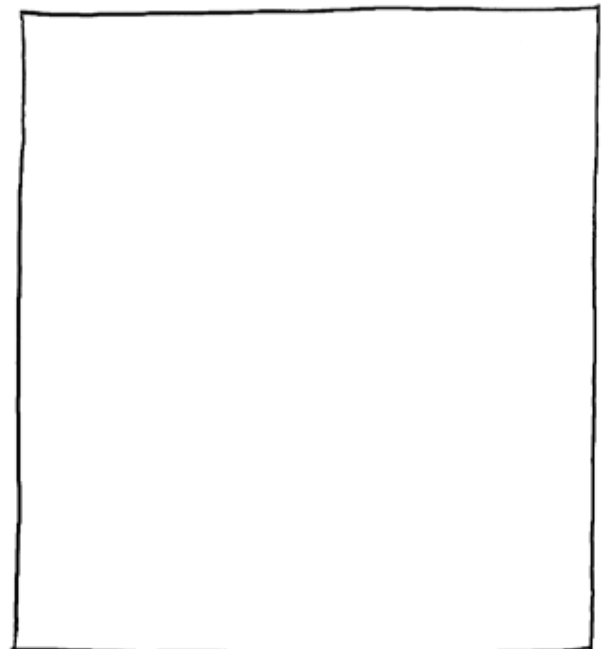

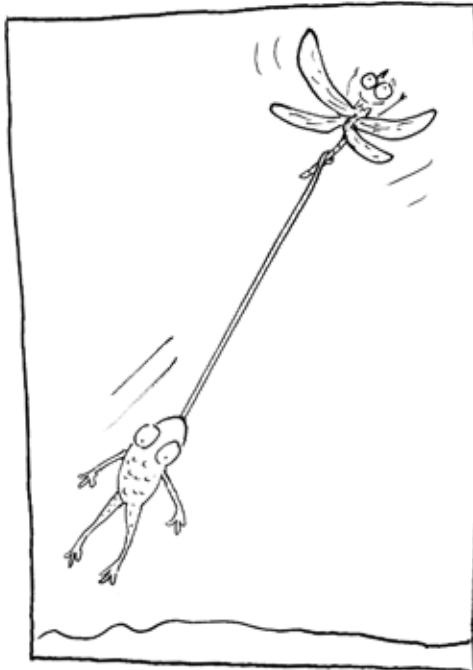

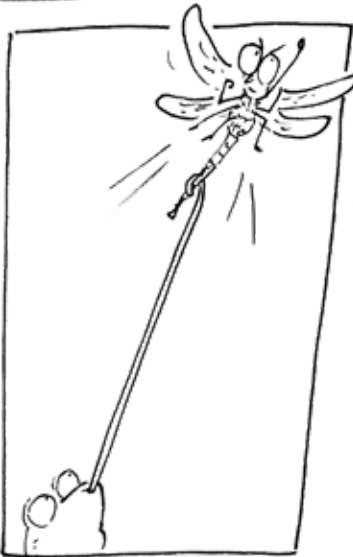

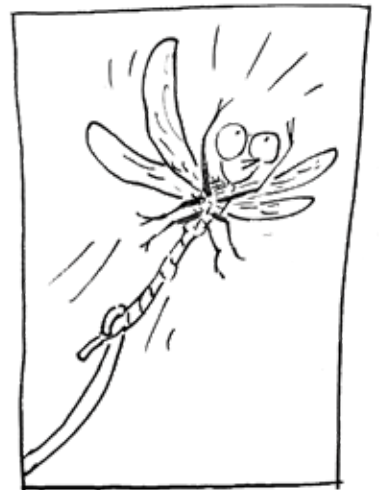

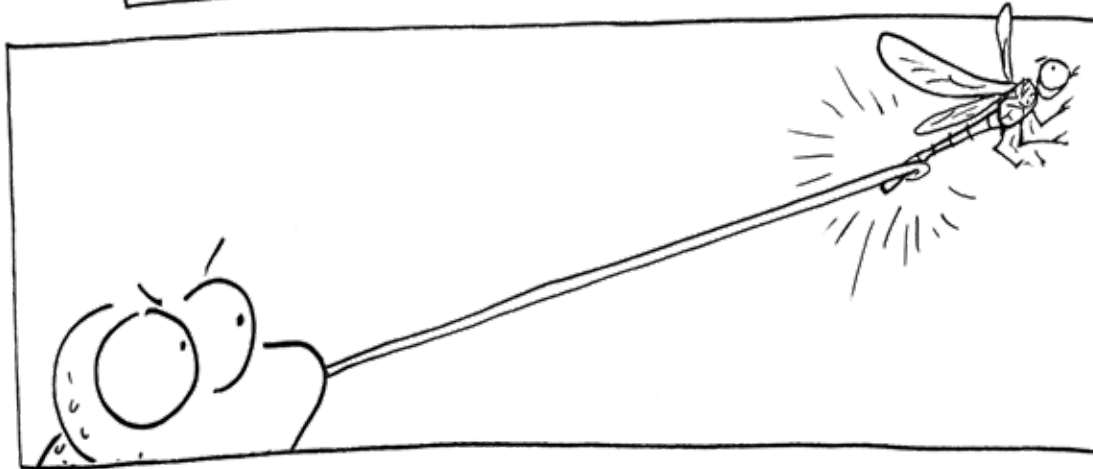

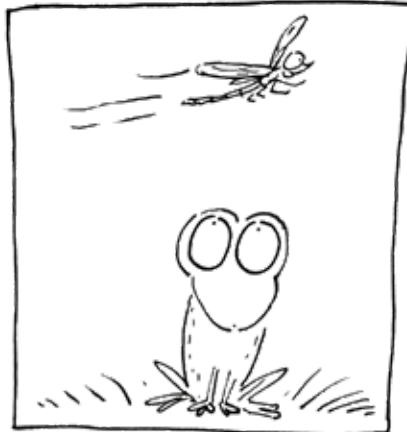

Taddy catches her first fly! She's not a little tadpole anymore!

There are more than 6,000 species of frogs. The red-eyed tree frog is small but colorful with big red eyes, huge orange feet and bright green, blue and yellow bodies. Draw what you think it looks like.

## Fun Frog Facts:

Talk about fast food! Frogs snap their long, sticky tongues faster than you can blink your eyes. They need to be fast because they only eat LIVE critters like mosquitoes, flies, and dragonflies. Color the story of how this little frog gets carried away by his big catch.

Draw your own ending to the story here. What happens to Frog?
